

PSY 490 EXIT EVAL  
DATA REPORT

The exit evaluation is filled out by psychology majors in the Senior Seminar course (Psy 490) and is used as part of the overall assessment of cumulative student program learning outcomes for Psychology. The exit evaluation form has a reliability of .95. It utilizes a Likert scale where 1=strongly disagree, 2= disagree, 3= uncertain, 4= agree and 5= strongly agree.

This report utilizes data from 2007-2009 for both the day undergraduate psychology program and the evening (AEOP) undergraduate psychology program. Data from the 2009 exit evaluation report for the evening program (AEOP) will be analyzed and reported once the current term finishes.

The evidence indicates that the program is well received, and that students perceive they have learned and are able to demonstrate program student learning outcomes. A specific area of concern, where the mean is below 4.0 and the % strongly agree/agree is below 80%, is in the area of statistics. A new instructor will be teaching the statistics course (Psy 315) during the Fall day 2009 term.
