

**Undergraduate Psychology Program
Day and PACE
Trend Analysis for the Last Six Years (2011-2016)
Of
Marianist Educational Values Papers
And
Evolutionary Psychology Thread Papers
Submitted 2/21/17**

As part of the assessment process of undergraduate program student learning outcomes in Psychology, Psychology majors are required to write two papers in their capstone course PSY 490, which is usually taken during the last semester of their Senior year. The papers address the Program Student Learning Outcome of **Psychology as an Integrated System** and how the Chaminade Mission Statement, as expressed by the Five Marianist Educational Values, are integrated within the Psychology program. One paper integrates Marianist Educational Values with the Psychology program student learning outcomes. The second paper integrates and links the Psychology program student learning outcomes with the thread of evolutionary psychology. Both of these papers, while dependent upon declarative knowledge (theory) regarding the program student learning outcomes in Psychology, are essentially about demonstrating procedural knowledge (**how to**). Thus, within the context of writing two papers in APA format, which is itself an example of procedural knowledge, students are required to demonstrate **how** (procedural knowledge) to integrate Evolutionary Psychology with program student learning outcomes in Psychology and **how** (procedural knowledge) to integrate the Five Marianist Educational Values with program student learning outcomes in Psychology.

The PSY 490 capstone class is offered every **Spring** for the Day program students. The PSY 490 capstone class is offered **Spring** and **Fall** terms by the Professional and Continuing Education program (PACE).

All faculty members who teach the PSY 490 course and assess the papers through a rubric (10 categories = total score) have been subject to and assessed with the rubric for inter-rater reliability. Inter-rater reliability for both papers is good (Marianist paper = **.8581** and evolutionary thread paper = **.7468**).

Given the below rating scale, the **meets standard total score** is **20** points for both papers. The **meets standards score** for each of the categories is **2** points.

Does Not Meet Standards	Meets Standards	Exceeds Standards
1-----	-----2-----	-----3

The last three assessments for the **total score** for both the Day and PACE programs are fairly consistent, within and between groups, for both papers. Percent of students obtaining a **meets standards** or **exceeds standards** score is noted for each category across the term/semester. Information from the rubrics from both papers provides the instructor with data regarding the strengths and weaknesses of student performance and areas that need to be addressed within the context of the course and overall program. A major change in the program curriculum as a result of the analysis of rubrics was the making of Evolutionary Psychology a required course (Fall 2010) in the Psychology major. It was not required in the PACE program until Academic year 2011-2012. Thus its inclusion in PACE has required some adjustment.

The review of the **Marianist Values** paper indicates concerns (mean below 2.0) with **References** and **Conclusion** for both PACE and Day programs. The review of the **Evolutionary Thread** paper indicates concerns (mean below 2.0) with **Mechanics** and **Conclusion** for the Pace program and **Mechanics**, **References** and **Conclusion** for the Day programs. Based on this assessment and to better evaluate concerns and create interventions, if warranted, one faculty member will be teaching Psy 490 both in the Day Undergrad program and the PACE program for the 2017-2018 school year.

Analyses for both the PACE and Day programs for the rubric for each paper, across the total score and 10 categories, for the last six years can be found below. The PTS= above the **3 category description** is where the instructor puts the points in the rubric for each category for each student.

These two papers address and provide evidence demonstrating positive results of program student learning outcomes for written communication regarding **WASC CFR 2.2a**: Undergraduate programs engage students in an integrated course of study of sufficient breadth and depth to prepare them for work, citizenship, and life-long learning. These programs ensure the development of core competencies including, but not limited to, **written** and oral communication, quantitative reasoning, information literacy, and critical thinking.

**RUBRIC FOR MARIANISTVALUES PAPER
AND ANALYSIS
2011-2016**

Inter-Rater Reliability = .8581

8. MECHANICS

PTS=

No abstract. (Does not use correct font of 12 and 1" margins, not doubled spaced, pages are not numbered, no cover page) Paper does not meet full 10 page requirement (Page length does not include abstract, cover page or reference page). All of the above must be present. Paper is not professional in appearance.	Meets use of abstract, correct font of 12 and 1" margins, doubled spaced, pages are numbered, cover page, page length of minimal full 10 pages. Paper is professional in appearance (no whiteouts, no hand written components or changes, etc.)	Meets use of abstract, correct font of 12 and 1" margins, doubled spaced, pages are numbered, cover page, and exceeds page length of minimal full 10 pages (12-15 pages). Paper is professional in appearance (no whiteouts, no hand written components or changes, etc.)

9. REFERENCES

PTS=

APA reference format not used, APA reference used in narrative but not in reference page, or APA used in reference page but not in narrative. Does not meet minimal credible reference requirement of eight references (professional journals, professional texts, valid internet sites- Wikipedia is not acceptable)	APA reference used in narrative and used in reference page. Meets minimal credible reference requirement of eight references (professional journals, professional text, valid internet sites- Wikipedia is not acceptable)	APA reference used in narrative and used in reference page. Exceeds minimal credible reference requirement of eight references (ten or more) (professional journals, professional texts, valid internet sites- Wikipedia is not acceptable)
